

Lowe's Selects Guidance Software's EnCase eDiscovery Suite to Manage In-House Electronic Data Discovery

Leading Do-It-Yourself Retailer Will Use the eDiscovery Suite to Automatically Search, Collect and Preserve Electronically Stored Information Across Its Network

PASADENA, Calif., Sep 13, 2007 (PrimeNewswire via COMTEX News Network) --

Guidance Software Inc. (Nasdaq:GUID), the World Leader in Digital Investigations(tm), today announced that home improvement retailer Lowe's Companies, Inc. (NYSE:LOW) has licensed the EnCase(r) eDiscovery Suite to conduct electronic discovery across its U.S.-based network. The agreement between the parties was signed in the second quarter of 2007. Lowe's, which serves approximately 13 million customers a week in its more than 1,400 stores, will use the top-ranked software to search, collect and preserve electronically stored information.

"Leveraging the power of our flagship product -- EnCase(r) Enterprise -- the Encase eDiscovery Suite will allow Lowe's to reduce risk and address several core requirements in the eDiscovery process," said John Colbert, CEO of Guidance Software.

About Guidance Software (GUID)

Guidance Software is recognized worldwide as the industry leader in digital investigative solutions. Its EnCase(r) platform provides the foundation for government, corporate and law enforcement organizations to conduct thorough, network-enabled, and court-validated computer investigations of any kind, such as responding to eDiscovery requests, conducting internal investigations, responding to regulatory inquiries or performing data and compliance auditing -- all while maintaining the integrity of the data. There are more than 20,000 licensed users of the EnCase technology worldwide, and thousands attend Guidance Software's renowned training programs annually. Validated by numerous courts, corporate legal departments, government agencies and law enforcement organizations worldwide, EnCase is also frequently honored with industry awards and recognition from eWEEK, SC Magazine, Network Computing, and the Socha-Gelbmann survey.
