## The Litigation Support Technology Group

**Honorary President : Senior Master Whitaker**

**Senior Master of the Supreme Court, Queen's Bench Division and  
Queen's Remembrancer Member of the Civil Procedure Rule Committee**

LiST is a unique UK think tank, formed in 2003 by a group of litigation support specialists with the aim of encouraging and developing uniformity of approach to the use of technology in civil litigation and alternative dispute resolution. We are delighted to be able to sponsor the Electronic Disclosure Support/Service Provider of the Year and Online Product of the Year categories in the 2008 Legal Technology Awards.

Since its inception LiST has produced the following library of industry documents:

**Draft Practice Direction for the Use of IT in Civil Proceedings**

**Draft Technology Questionnaires**

**Data Exchange Protocol Part 1 of 2: Disclosure Documents**

**Data Exchange Protocol Part 2 of 2: Disclosure Data**

We hope that this, and future, work will be endorsed by lawyers and judges and evolve into customarily accepted standards and processes, thereby minimising unnecessary disruption and delay, encouraging a collaborative approach and achieving significant cost savings for clients.

We are always looking to increase our membership, particularly from smaller firms, in-house counsel and Government departments. LiST welcomes additional participants and contributions from interested litigation support specialists. Read more about LiST at [www.listgroup.org](http://www.listgroup.org). If you are interested in joining LiST please send an email to our **Membership Secretary** at [membership@listgroup.org](mailto:membership@listgroup.org) and include full contact details and a brief resumé of your relevant experience. At the moment membership is free.
